

Schriftenverzeichnis

Eingereichte Arbeiten

- -, T. Lorson: *Convolution operators on spaces of holomorphic functions*.

Veröffentlichte und angenommene Arbeiten

53. -, H.-P. Beise, T. Meyrath: *Mixing Taylor shifts and universal Taylor series*. Erscheint in: Bulletin of the London Mathematical Society.
52. -, S. Episkoposian: *Universality properties of Walsh-Fourier series*. In: Monatshefte für Mathematik 175.2014, 511-518.
51. -, H.-P. Beise, T. Meyrath: *Limit functions of discrete dynamical systems*. In: Conformal Geometry and Dynamics 18.2014, 56-64.
50. -, T. Meyrath: *On the behaviour of the successive derivatives of meromorphic functions on the final set*. In: Journal d'Analyse Mathématique 120.2013, 131-149.
49. -, P. Beise: *Limit functions of iterates of entire functions on the Julia set*. In: Proceedings of the American Mathematical Society 141.2013, 3929-3933.
48. -, T. Kalmes, M. Nieß: *On the behaviour of power series in the absence of Hadamard-Ostrowski gaps*. In: Comptes Rendus Mathématique 351.2013, 255-259.
47. -, T. Pohlen: *The Hadamard product on open sets in the extended plane*. In: Complex Analysis and Operator Theory 6.2012, 257-274.
46. -, H.-P. Beise: *Growth of (frequently) hypercyclic functions for differential operators*. In: Studia Mathematica 207.2011, 97-115.
45. -, I. Bruj: *The concept of Faber derivative in saturation theory*. In: Jaen Journal on Approximation 3.2011, 227-239.
44. -, P. Beise, T. Meyrath: *Universality properties of Taylor series inside the domain of holomorphy*. In: Journal of Mathematical Analysis and Applications 383.2011, 234-238.

43. - I. Bruj: *Classes of functions and matrix means of orthogonal series*. In: Science.Education.Technology - 2010: The Materials of the Third International Scientific Practical Conference, October 21-22, 2010, Baranovichi, (Russian), 230-232 und 232-234.
42. *Continuous functions with universally divergent Fourier series on small subsets of the circle*. In: Comptes Rendus Mathematique 348.2010, 1155-1158.
41. -, T. Pohlen: *The Hadamard product as a universality preserving operator*. In: Computational Methods and Function Theory 10.2010, 281-289.
40. - T. L. Gharibyan, W. Luh: *A lacunary version of Mergelian's approximation theorem*. In: Journal of Approximation Theory 162.2010, 709-716.
39. - M. Nieß: *Lacunary tangential approximation*. In: Indagationes Mathematicae (N.S). 20.2009, 453-461.
38. -, L. Frerick, V. A. Martirosian: *On the existence of lacunary power series analytically continuable and bounded outside sectors*. In: Complex Variables and Elliptic Equations 54.2009, 669 - 676.
37. -, V. Vlachou, A. Yavrian: *Overconvergent series of rational functions and universal Laurent series*. In: Journal d'Analyse Mathematique 104.2008, 235-245.
36. -, W. Gawronski, M. Reinhard: *Reduced cancellation in the computation of entire functions and applications to the error function*. In: SIAM Journal on Numerical Analysis 45.2007, 2564-2576.
35. - T. L. Gharibyan, W. Luh: *Lacunary (R, p, M) -summability*. In: Analysis 27.2007, 311-321.
34. -, N. Arakelian, W. Luh: *On the localization of singularities of power series*. In: Complex Variables and Elliptic Equations 52.2007, 561-573.
33. -, V. A. Martirosian: *A Liouville type result for lacunary power series and converse results for universal holomorphic functions*. In: Analysis 26.2006, 393-399.

32. -, S. Naik, S. Ponnusamy: *Growth of entire functions of exponential type defined by convolution*. In: Archiv der Mathematik 87.2006, 330-342.
31. -, V. Vlachou, A. Yavrian: *Universal overconvergence and Ostrowski-gaps*. In: Bulletin of the London Mathematical Society 38.2006, 597-606.
30. -, W. Luh, S. Ponnusamy, P. Vasundhara: *Polynomial series expansions for confluent and Gaussian hypergeometric functions*. In: Mathematics of Computation 74.2005, 1937-1952.
29. -, D. Mayenberger: *Faber series with Ostrowski-gaps*. In: Complex Variables 50.2005, 79-88.
28. -, T. L. Gharibyan, W. Luh: *Lacunary summability and analytic continuation of power series*. In: Analysis 24.2004, 255-271.
27. -, M. C. Calderon-Moreno: *Universal holomorphic and harmonic functions with additional properties*. In: Acta Mathematica Hungarica 105.2004, 1-15.
26. -, L. Frerick: *Polynomial approximation on compact sets bounded by Dini smooth arcs*. In: Computational Methods and Function Theory 3.2003, 273-284.
25. -, T. L. Gharibyan, W. Luh: *Approximation by lacunary polynomials and applications to universal functions*. In: Analysis 23.2003, 199-214.
24. *An extended Faber operator*. In: Constructive Approximation 19.2003, S. 399-410.
23. -, L. Frerick, J. Wengenroth: *Prescribed derivatives of holomorphic functions*. In: Complex Variables 48.2003, S. 165-173.
22. -, W. Luh, V. A. Martirosian: *Restricted T -universal functions on multiply connected domains*. In: Acta Mathematica Hungarica 97.2002, S. 173-181.
21. -, A. Yavrian: *On polynomial sequences with restricted growth near infinity*. In: Bulletin of the London Mathematical Society 34.2002, S. 189-199.

20. -, W. Luh, V. A. Martirosian: *Restricted T -universal functions*. In: Journal of Approximation Theory 114.2002, S. 201-213.
19. *Series expansions for computing Bessel functions of variable order on bounded intervals*. In: Numerical Algorithms 24.2000, S. 299-308.
18. -, W. Gehlen, W. Luh: *On the existence of O -universal functions*. In: Complex Variables 41.2000, S.81-90.
17. *Convergence acceleration of Taylor sections by convolution*. In: Constructive Approximation 15.1999, S. 523-536.
16. -, W. Luh, V. A. Martirosian: *T -universal functions with lacunary power series*. In: Acta Scientiarum Mathematicarum 64.1998, S. 67-79.
15. -, W. Luh, V. A. Martirosian: *Universal entire functions with gap power series*. In: Indagationes Mathematicae (N.S.) 9.1998, S. 529-536.
14. -, J. Wengenroth: *Separating singularities of holomorphic functions*. In: Canadian Mathematical Bulletin 41.1998, S. 473-477.
13. -, L. Frerick: *Infinite Taylor interpolation*. In: Proceedings of the American Mathematical Society 125.1997, S. 3331-3337.
12. *Accelerated polynomial approximation of finite order entire functions by growth reduction*. In: Mathematics of Computation 66.1997, S. 743-761.
11. -, R. Brück: *Closed ideals in a convolution algebra of holomorphic functions*. In: Canadian Journal of Mathematics 47.1995, S. 915-928.
10. -, R. Brück, A. Sharma: *Equisummability of certain sequences of Hadamard products of Taylor sections and interpolatory polynomials*. In: Methods and Applications of Analysis 1.1994, S. 270-283.
9. -, L. Frerick: *Polynomial approximation and maximal convergence on Faber sets*. In: Constructive Approximation 10.1994, S. 427-438.
8. -, R. Brück: *Summability of Hadamard products of Taylor sections with polynomial interpolants*. In: Journal of Approximation Theory 78.1994, S. 30-40.

7. *Coefficient multipliers from $H(G_1)$ into $H(G_2)$.* In: Archiv der Mathematik 61.1993, S. 75-81.
6. *On numerical analytic continuation and convergence acceleration by summability methods.* In: Analysis 13.1993, S. 279-291.
5. *Small domains of overconvergence of power series.* In: Journal of Mathematical Analysis and Applications 172.1993, S. 500-507.
4. -, R. Brück: *Invertible elements in a convolution algebra of holomorphic functions.* In: Mathematische Annalen 294.1992, S. 421-438.
3. *The Hadamard multiplication theorem and applications in summability theory.* In: Complex Variables 18.1992, S. 155-166.
2. *Approximation with lacunary polynomials in the complex plane.* In: Approximation, interpolation and summability: In honor of Amnon Jakimovski on his 65th birthday. Hrsg.: S. Baron. Ramat-Gan: Bar Ilan Univ. 1991. (Israel mathematical conference proceedings; 4). S. 217-224.
1. *Über analytische Fortsetzung mit Matrixverfahren.* In: Mitt. Math. Sem. Gießen 199.1990, S.1-90.

Dissertation und Habilitationsschrift

- *Über analytische Fortsetzung mit Matrixverfahren.* Dissertation, Trier, 1989.
- *Convergence acceleration of polynomial expansions for finite order entire functions.* Habilitationsschrift, Trier 1995.
